

Kel-Tec 2017

PRODUCT GUIDE

A man with short brown hair, wearing a blue and white plaid short-sleeved button-down shirt, is holding a Kel-Tec rifle. He is looking off to the side with a serious expression. The background is a blurred outdoor setting with trees.

Unique High-Performance Firearms for Self-Defense, Hunting and Recreation

Every Kel-Tec handgun, rifle and shotgun design offers unique benefits and comes with a lifetime warranty. Founded by George Kellgren in 1991, Kel-Tec is one of the top five US firearms makers, shipping over 150,000 guns in 2016. Located in rural Cocoa, FL, Kel-Tec is one of Brevard County's strongest employers, with over 260 people working on 100,000 sq.ft of production space with 60+ CNC machines.

Affordable and Popular Arms

Over 2 million of Kel-Tec guns are in use in the United States and world-wide. Most of the designs deliver unique performance for the size and weight, all are reasonably priced for the value delivered. They are in use from the Alaskan wilderness to deep concealment in the urban jungles to backups unofficially carried by Swiss militiamen.

RDB and RDB-C are fully ambidextrous downward ejecting rifles feeding from standard AR magazines. Both models are reliably sub-MOA and easy to shoot well thanks to exceptionally low recoil. Modular design provides versatility and ease of maintenance. Adjustable long stroke gas system is sound suppressor friendly. Massive overtravel of the bolt with ejection down behind the magazine provides reliably energetic feeding and a gentle extraction cycle. Available in 5.56mm with 17.3" or 20" barrel, the RDB is excellent for competitive shooting or home defense. Accurate and very compact, 5.56mm or 6.5mm Grendel RDB-C is superb for long-range hunting with either 20" or 24" barrel. Designed without a conventional pistol grip, it is also legal in more jurisdictions.

RDB-C 24"

RDB 17.3"
5.56mm

RFB is a fully ambidextrous forward ejecting 7.62mm NATO rifle feeding from FAL compatible magazines. Available with 18" or 24" barrels, RFB shoots around 1MOA. Adjustable short stroke gas system is sound suppressor friendly. Forward ejection channels spent brass away from the spotter, and gas away from the shooter. It offers a lot of power in a compact, well balanced form.

KSG is a fully ambidextrous downward ejecting bullpup 12ga pump shotgun with TWO 7-shot (2.75") tube magazines. KSG 18.5" barrel comes with internal choke threads. Chambered for 3" shells, KSG also cycles shorter loads for higher capacity.

KSG-NR comes with shorter (4+4) magazine tubes and a barrel ready for conversion to NFA registered short-barreled shotgun.

With optional
flash hider

CMR30 carbine and **PMR30 pistol** use the same 22WMR cartridge and 30-round magazines. Lightweight and accurate, they have negligible recoil and considerable firepower. CMR30 carbine features a multi-position collapsible stock. CMR30 comes with a threaded barrel, PMR30 has it available as an optional accessory.

SU16 is a compact short stroke piston carbine in 5.56mm NATO. A full accessorized, loaded SU16 with an integral bipod weighs the same as an empty M4 carbine without optics. Lightweight and modular, it is available in a wide variety of configurations for different tasks and regulatory environments.

SU16E

SU16A

SU16CA

SU16C

See other configurations at KelTecWeapons.com.

PLR16 is the pistol variant, providing high velocity long range capability in a concealable form. Much lighter than AR pistols, it also doesn't require a protruding buffer tube. Both SU16 and PLR16 use standard AR15 magazines.

SU22E

SU22CA

SU22 duplicates the SU16 manual of arms in a rimfire caliber for cheaper and quieter training. Lightweight and accurate, it works equally well for small game hunting, competitive sport and range practice. Feeds from AR15-22 magazines with capacity 10 to 50 rounds.

PLR22 is the pistol variant.

SUB2000 carbine comes in 9mm Luger and 40S&W calibers. Two variants are available, accepting either Glock 17/19/22/23 or Sig-Sauer P226/320, Beretta 92/96, Smith&Wesson M&P, and CZ75/85 magazines. The carbine folds in half for transport, measuring only 16¼” in length when stowed.

P11 is a compact, affordable 9mm carry pistol with 10+1 capacity. Optional 12-round magazines are also available.

PF9 pistol is thin, light and carries 7+1 rounds of 9mm Luger. It is excellent for concealed carry. Mild recoil makes extensive training with PF9 comfortable.

P3AT is a tiny, 6-ounce locked breech deep concealment pistol in 380ACP. Standard capacity 6+1, extended magazines are available.

P32 is as light and tiny, holding 7+1 of 32ACP for even lower recoil.
